

For Immediate Release

24th October 2016

AHF wins prestigious 2016 Inside Housing Top 60 Development Award.

The Government guaranteed aggregator Affordable Housing Finance (AHF) was recently awarded the 2016 Innovative Finance Development of the Year Award for its contributions to the affordable housing sector and its delivery of the Affordable Housing Guarantee Scheme (AHGS). This achievement signifies AHF's continued efforts to produce the lowest form of long term debt to a wide selection of housing associations.

The Top 60 Development Awards recognise a selection of institutions that have displayed excellence and diligence in the provision/finance of affordable homes. Each category was judged by a panel of industry experts. These experts saw how important the AHGS has been in delivering badly needed affordable homes, making particular reference to AHF having financed over 60 HAs since its inception in 2013. AHF's Chief Executive, Piers Williamson commented:

"This award is tangible industry recognition of the contribution that AHF funding is making towards delivering a whole range of badly needed affordable homes across the nation. I am particularly pleased to involve many of our team in collecting the award who have all worked so hard to make the programme such a success."
